The Rice Centennial House Project
Rice Centennial House Project

• Rice University’s Habitat for Humanity chapter is leading the Rice community in designing, funding and building a new Habitat for Humanity home. A diverse coalition of Rice University and Houston area community members worked together to raise $65,000, in order to:
  1. Build a new low-cost home that demonstrates the compatibility of sustainability and affordability;
  2. Honor and renew Rice’s commitment to volunteerism as it enters its second century; and
  3. Give back to the community by offering the benefit of homeownership to a local family in need.

Wall Build on October 12th as a part of Rice Day
Update

• Official community service component of the Centennial
• Lots of Media Attention
• Outreach to friends and family
• Will be home to a Single mother and her young children.
